

## Nubo Release 1.3

Date: January, 2017

Status: Released.

## Release Notes

### UXIP Enhancements

- Smoother transition when re-opening the Nubo player. Includes: fast re-connect, faster screen display and screen flickering prevention.
- iOS player - Display issue fixes on some apps.
- Scroll performance improvement.
- Fast re-connect when device changes between wifi and cellular.
- Video playback fix on web browser.
- App freeze fixes.
- Adding support for video and audio recording.

## Security Enhancements

- As a highly secure solution, we include security enhancements in each release, as well as conduct regular penetration tests and security code reviews.
- Adding a dedicated VPN connection from the cloud environment.

## Email/Calendar/Contacts Apps and Sync

- Allows fast sync time during session creation.
- Disconnect issue fixes with Office 365 and some versions of Exchange.
- Search fix on the email app.
- Sync issue fix with calendar that caused duplicated entries.

## Control Panel

- Adding a Dashboard with instant information about the Nubo status and usage.
- Adding 4 new reports.
- Adding a Web App wizard for a fast and simple generation of web apps.

## Settings

- Adding font size settings.
- Adding an option to enable/disable sound notification and vibration.
