Release Summary

Release Date: October 2017

Nubo Software announces the release of version 1.6.

This release notes describes new features since the last released version.

New Features

- **UXIP Enhancements**
 - Open GL support – Support apps which use an open GL functionality. This allows using all ranges of graphical apps.
 - Finger print API support for both iOS and Android.
 - Add support for executing virtual apps that are separated from the work environment.
 - Add an alternative notification mechanism for environments that cannot use GCM or APNS

- **Security Enhancements**

- Add strict security parameters checks between the Nubo management and various components in the systems, including client apps, database and memory cache.
- Add more separations between services in order to increase security.
- Improve UXIP protocol security.
- Add the option to restrict apps to packages that are signed with a specific corporate key.

- **Nubo Apps**

- Various fixes in the Nubo email client to support more server configurations and email formats.
- Chromium – support latest browser versions and technology. This enhances web apps compatibility and supports the latest web technologies.
- Add a new and improved Gallery app.
- Add a new and improved File Browser app.

- **Android client**

- Support for Android 8
- Fix bugs on keyword for some hardware models.
- Fix memory issues with large images.
- Fix display issues with web applications.

- **iOS client**

- Support for iOS 11.
- Fix various display issues.

- **HTML 5 client**

- Support video playback.
- Support the use of the mouse scroll wheel.

Fixes

- ✓ Gateway redundancy - in some cases the active sessions didn't move to the redundant Gateway.
- ✓ Multiple daemons - 2 daemons appear when MGMT shutdown incorrectly
- ✓ Gateway lost communication to redis after management restart
- ✓ Push notification - appears below launcher

Known Issues

- Incompatible with drivers in some new Hardware with ubuntu 14.4 and kernel 3.x (such as Lenovo x150).
- Incompatible OpenGL apps with some devices.
